

Claims

1. A composition for the oral administration of a drug which achieves drug release in two spikes and which comprises particles, wherein the particles consist of a homogenous mixture which comprises the drug and an enteric polymer.
5. A composition of claim 1 wherein the ratio of enteric polymer to drug is at least 2 and less than 100.
10. A composition of claim 1 wherein the ratio of enteric polymer to drug is from about 4 to about 50.
15. 4. A composition of claim 1 wherein the ratio of enteric polymer to drug is from about 10 to about 20.
5. A composition of any of claims 1 to 4 wherein the enteric polymer is polyvinyl acetate phthalate.
20. 6. A composition of any of claims 1 to 5 wherein the drug is methylphenidate or a salt thereof.
